BAT SAMPLING

Number of Trees where Bat are nesting =25.

Sampling technique as stratified random in 1 tree =50

Therefore as $50 \times 25 = 1250$ approx. no. of Bats.

PARROT SAMPLING

Number of Trees where Parrots are nesting = 15.

Sampling technique as stratified random in 1 tree = 10

Therefore as $15 \times 10 = 150$ approx. no. of Parrots

To,

The Divisional Forest Officer,
Parbatjhora Forest Division, Suparighat,
Kokrajhar, Assam (B.T.C.)

Sub: Prayer for N.O.C. for the construction of School at village Ghugujhora.

Sir,

With reference to the subject cited above, I have the honour to state that the Gossaigaon College, Gossaigaon in collaboration with NCC unit, Gossaigaon College has adopted the village Ghugujhora under Gossaigaon sub-division with a view to making it a model village in the locality. After having close observation on the socio-economic conditions of the villages falling within the radius of 8 Kms from the College, it has been found that the village Ghugujhora happens to be one of the poorest villages in the area. Keeping in mind the above criteria, the college has decided to adopt Ghugujhora as its adopted village. The College has already started its activities such as cleaning, teaching the school kids etc. As the School of the village is in a very pathetic condition, the College has decided to construct a school in its adopted village so as to help the children to receive education in a good environment.

That sir, I am seeking for the NOC from your end as the village has been identified as a forest village and come under your jurisdiction.

Under the above circumstances, I earnestly request you kindly to issue an NOC for the construction of the school in its present location so as to help the villagers in providing education to their children without any difficulty. For this act of your kindness, I shall ever remain grateful to you.

Yours faithfully,

Principal,

Gossaigaon College, Gossaigaon
