**UNDERTAKING**

This is to certify that the following documents and information given in respect of the Metrix 4.2 (**4.2.1: Library is automated using Integrated Library Management System (ILMS), subscription to e-resources, amount spent on purchase of books, journals and per day usage of library**) is true to the best of my knowledge and belief.

  
Principal,  
Gossaigaon College, Gossaigaon

#### **4.2.1: Library is automated using Integrated Library Management System (ILMS)**

##### **Koha library automation software:**

Koha is the first free software library automation package. In use worldwide, its development is steered by a growing community of users collaborating to achieve their technology goals. Koha's feature set continues to evolve and expand to meet the needs of its user base.

Full-featured ILS. In use worldwide in libraries of all sizes, Koha is a true enterprise-class ILS with comprehensive functionality including basic and advanced options. Koha includes modules for acquisitions, circulation, cataloging, serials management, authorities, flexible reporting, label printing, multi-format notices, offline circulation for when Internet access is not available, and much more. Koha will work for consortia of all sizes, multi-branch, and single-branch libraries.

Multilingual and translatable. Koha has a large number of available languages, with more languages every year.

Full text searching Powerful searching, and an enhanced catalogue display that can use content from Amazon, Google, LibraryThing, Open Library, and Syndetics, among others.

Library Standards Compliant. Koha is built using library standards and protocols such as MARC 21, UNIMARC, z39.50, SRU/SW, SIP2, SIP/NCIP, ensuring interoperability between Koha and other systems and technologies, while supporting existing workflows and tools.

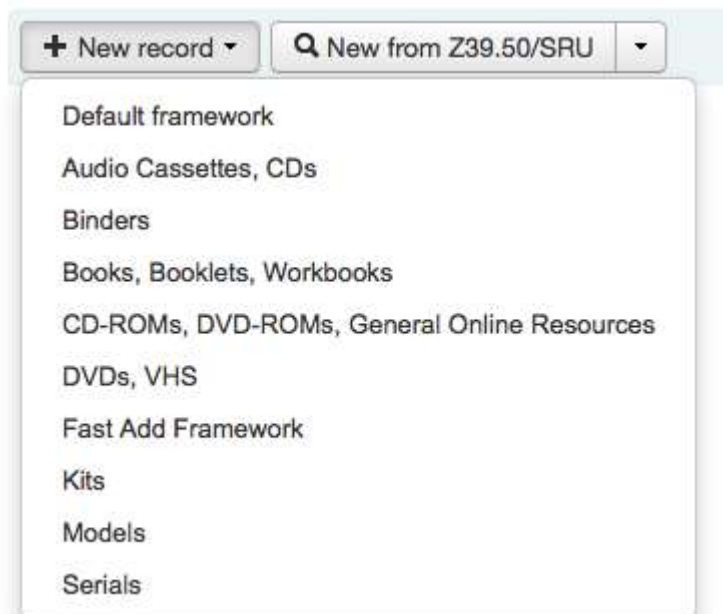

Web-based Interfaces. Koha's OPAC, circ, management and self-checkout interfaces are all based on standards-compliant World Wide Web technologies—XHTML, CSS and Javascript—making Koha a truly platform-independent solution.

## Cataloging

Cataloging is the process of creating and maintaining bibliographic and authority records in the library catalog, the database of books, serials, sound recordings, moving images, cartographic materials, computer files, e-resources etc. that are owned by a library. The catalog may be in tangible form, such as a card catalog or in electronic form, such as online public access catalog (OPAC). Relative to the movement of materials within technical services, cataloging usually follows the receipt of ordered books in acquisitions.

## Adding records

Records can be added to Koha via original or copy cataloging. You can also choose to use the basic or advanced cataloging interface for all of your work.

## Circulation

Circulation functions can be accessed in several different ways. On the main page of the staff client there are some quick links in the center of the page to check items out, in or transfer them. For a complete listing of Circulation functions you can visit the Circulation page which is linked from the top left of every page or from the center of the main page.

## Check out (issuing)

Check out or Book Issues comprises of the activity of lending/issuing of library books to Students & Faculty. It is done through barcode scanner or entering the patron barcode or part of their name.

Enter patron card number or partial name:

## OPAC

OPAC is an access tool and resource guide to the collection of a library, which provides bibliographic data in machine-readable form and can be searched interactively on a computer terminal by users. It is an interface of information retrieval system which assist principally to locate book, Journals, CDs etc available in library using several access points. The search can be made on either Title, Author, Publisher. Branch and key works.

## Reports

Koha Library automation system is an organized system that collects, processes, saves and stores all the library-related information such as the number of books, late fine, and books returned, issued material, etc and generates reports that could help the institution analyze the ins-and-outs of books.

Koha's data is stored in a MySQL database which means that librarians can generate nearly any report they would like by either using the guided reports wizard or writing their own SQL query.

The following reports can be generated:

1. Custom reports
2. Statistics reports
  - i. Acquisitions statistics
  - ii. Patron statistics
  - iii. catalog statistics
  - iv. Circulation statistics
  - v. Serial statistics
  - vi. Holds statistics
  - vii. Patron with the most checkouts
  - viii. Most circulated items
  - ix. Patrons with no checkouts
  - x. Items with no checkouts
  - xi. Catalog by item type
  - xii. Lost items
  - xiii. Average loan time
